

Geography for Years 3 & 4 for week beginning 29th June 2020

Key Question: How do we use water?

Discussion with your parents:

1. Why is water important?
2. Where does it come from?

Now with your parent please read the slides called "Saving Water" and discuss them.

Questions for you to answer:

1. Can you think of ways we use water in the UK?
2. Do you think there is more land or water on our planet?
3. Why do we need to conserve water?
4. What are the 3 main categories for using water and which uses the most?
5. What is the meaning of "virtual water"?

Click on the slide to take the virtual water quiz. It should take you to this website:

<https://www.amnh.org/explore/ology/water/what-do-you-know-about-virtual-water>

Your Task (see the cards on the next page)

Choose one of the challenge cards and create a mind map of all the virtual water that was used to make that product. Think about:

- What is the product made from?
- Is it made from more than one material or ingredient?
- Did anything have to grow or drink water to make it?
- Did it have to be washed at any point?

How is virtual water used
to make...

a pair of jeans?

How is virtual water used
to make...

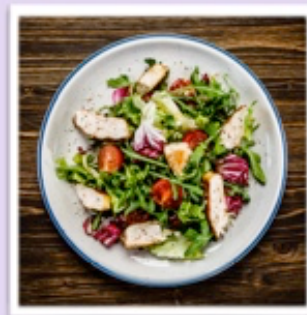

a burger?

How is virtual water used
to make...

a cup of hot chocolate?

How is virtual water used
to make...

a chicken salad?

Greater Depth Thinking.

Look at the slides again and some of the daily uses of water.
Complete the Plenary Activity. Can you name a way you use virtual
water?

Have a thoughtful week!
Love from Mrs Dennison
